- Silhouette offers a wide variety of colors from clear, black and metallic to pink, red, and topaz

Available at:

www.crafterscornersupplies.com

how to use rhinestones with your Silhouette

1 Select a rhinestone template in the Silhouette software. Feed the template material into the Silhouette on a cutting mat. Select media type "rhinestone template material" in Silhouette Studio® and cut.

2 Peel the template material off the backing leaving the circle cutouts behind.

3 Affix the template material to a rhinestone backing board.

**The Designer Edition Upgrade is required for creating rhinestone patterns (sold separately).*

4

Gently brush the rhinestones in a circular motion until all the holes are filled.

5

Cover the design with a piece of rhinestone transfer tape.

6

Lift the transfer tape off the template and position the design on the desired surface.

Place a thin cloth over the design and press down on top with a heated iron for 45-60 seconds.

Remove iron, cloth and transfer tape.

Turn the garment inside out and repeat. This will pull the glue into the fabric.

- The Silhouette Online Store offers hundreds of new rhinestone templates to choose from.
- Silhouette Studio® Designer Edition includes tools to create rhinestone templates from a variety of shapes and text.

- Silhouette rhinestones can be used with fabric and paper projects

- mix and match colors and sizes for a more custom look
